Gauge : "N" 1:148

Dimensions: Layout: 4feet X 1 foot

Space needed; 4'6" x 6'

Power: 1 X 13amp socket

Number of Operators: Two preferred to allow for breaks.

Can operate with one if necessary

Transport: Own Car. 2 hour radius from Ipswich.

Expenses: £30 approx

Set-up Time: 30 minutes approx

Insurance Value (stock & layout): £500

Contact: Iain Taylor, c/o IRMA, 40a, Norfolk Road, Ipswich, IP4 2HB

Email: iain@farquharsont.freemove.co.uk. Tel: 01473

Description

City Road is built on the principle that there is always room for a model railway.

Set in the late 1950's, it represents a cramped inner city freight terminus serving a number of warehouses adjacent to a large wholesale market. In addition there is a station to cater for the market workers and the factories shown in the background.

Viewing is from one of the new tower blocks that have been built in a re-developed area. It is planned that the market will eventually move to an out of town site and the whole area, including the railway will be the subject of urban renewal.
