WELTON INDUSTRIAL

Welton Industrial is a layout started back in July 2010 by 5 IRMA club members, and as the name suggests the layout is entirely industrial, named after the club building Welton House, which takes its name from a past President of the club.

It comprises:

1. A stone quarry loading head with a narrow-gauge railway supplying stone from the quarry.
2. An oil depot with large oil storage tanks and transfer facilities to road haulage.
3. Container depot to allow container trains to off load to road haulage.
4. Engine shed.
5. Fiddle Yard.

The layout operates under DCC control and, as well as the above features, has a double track main line which runs around the perimeter of the industrial complex.

The layout can be exhibited in either a 1980s blue/grey BR era, or more up-to-date with modern image rolling stock. See more here: <https://www.irma.org.uk/welton-industrial/>

Scale:	OO gauge
Dimensions:	9'4" x 13'6"
Power:	Two 240V plugs
Operators:	5
Transport:	Hire Van
Expenses:	Fuel
Set up Time:	Two hours
Insurance Value:	£12,000
